

How to prevent the *Reading Untagged Document* dialog from appearing in Adobe reader

When the dialog appears (usually when accessing one of the menus e.g. to print the document):

- Check the 'Always use the settings from the Reading Preferences (do not show this dialog again)' option, then click or say "Start".

In Adobe Reader, go to Edit Menu | Preferences | Reading and adjust the settings as below. Click or say "OK".

If you find the Reading Untagged Document dialog appears again (sometimes it pops up again once or twice), check 'Always use the settings from the Reading preferences' again > Start.
