

Recommended settings for Adobe reader

Adobe Reader X (not relevant to other versions)

1. In Adobe reader go to "Edit > Preferences > General Tab".
2. Uncheck "Enable Protected Mode at startup".
3. Close all applications including Dragon and restart computer

Note: Unchecking 'Enable Protected Mode at start-up' will affect screen reading technologies. So if Dragon User is also using screen reader technologies e.g. Jaws, Zoomtext, best to use an earlier version of Adobe reader e.g. version 9.

It's possible that the later versions of Adobe Reader X (later than V10.1.2?) don't have the 'Enable protected mode at start-up' setting. If you don't see this setting at Edit> preferences> General, then you don't need to do anything.
