

Tips for using the HT Professional Recorder app

File transfer options

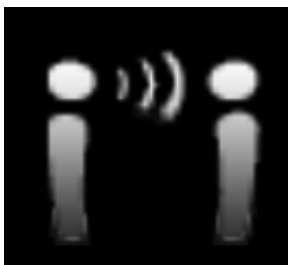

It is possible to transfer audio files to computer via email or DropBox.

When files are transferred via email, Dragon does not recognise the file format.

Settings

Go to iPhone settings, scroll down to HT Professional Recorder/voice recording sample rate. Set to 44,100 kHz

When recording speech for transcription, on the front screen of the app, set to this option:

And not to one of these options:

For more instructions, in the app, go to library/menu/owner's manual
